ZeeSpare

Service parts.
Smarter plans.

Clarity across demand, inventory and replenishment.

IDENTITY SYSTEM / OCTOBER 2026

A mark built to move.

One deliberate diagonal. Two connected positions. A signal for what comes next.

The precision Z connects inventory positions through a clear route. The detached terminal is a forward signal: the next part, the next decision.

CLEAR SPACE

Keep at least 1/4 of the symbol height around every side. Minimum symbol: 20px on screen, 6mm in print.

Quiet confidence. A sharp signal.

Forest anchors the system. Warm paper gives it room. Lime adds a controlled point of attention.

Forest
#103E31

Emerald
#155C46

Signal lime
#C2F970

Warm paper
#F7F8F2

Ink
#172F27

Inter

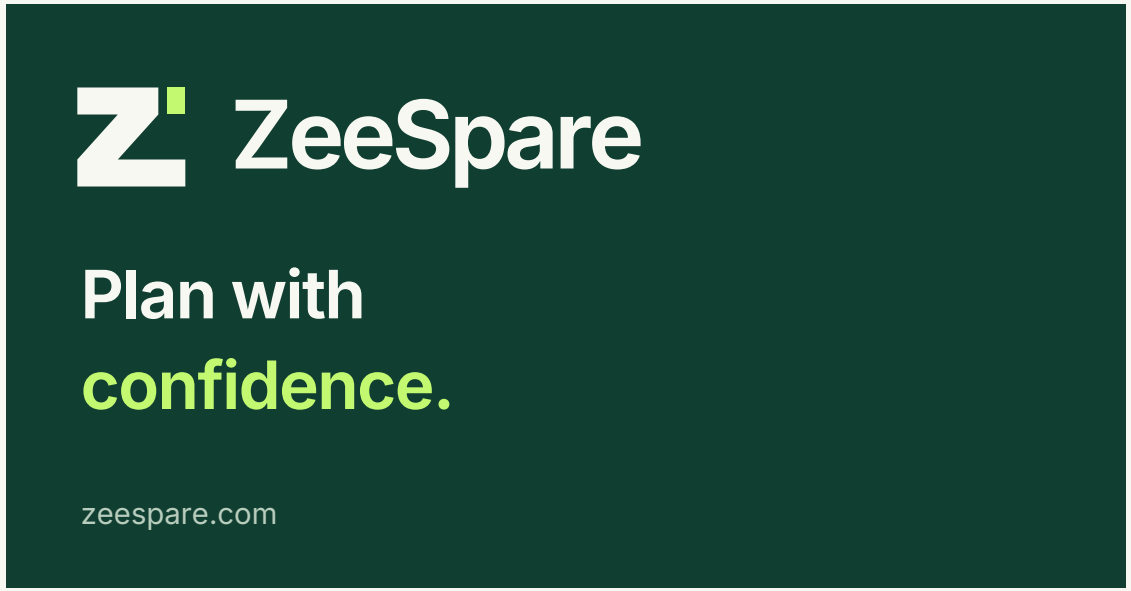
Aa Bb Cc 0123456789

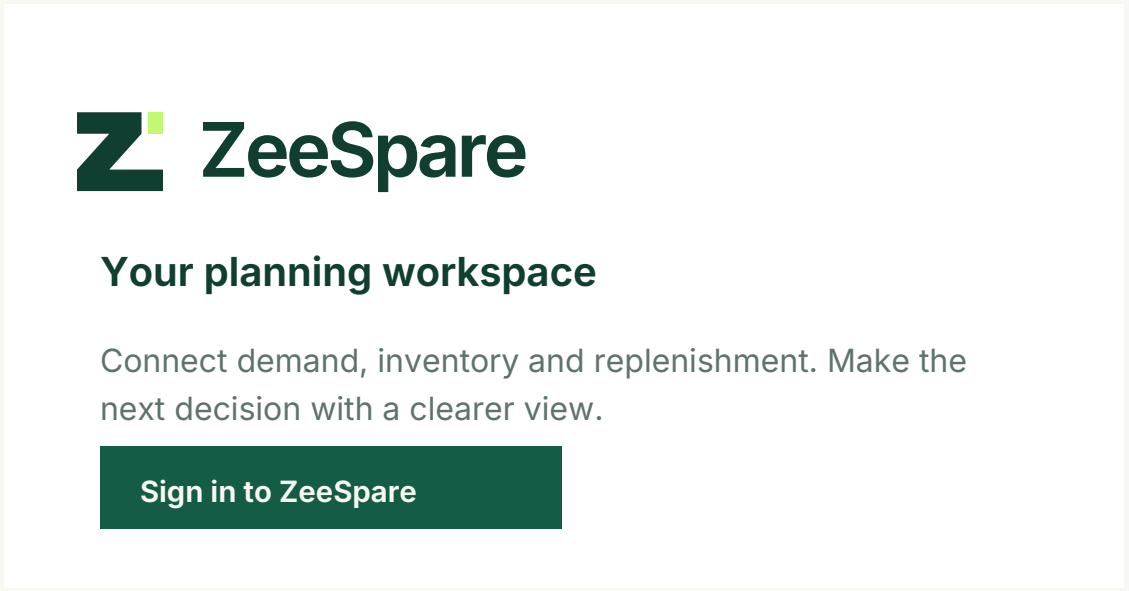
Use Inter for English and Noto Sans Arabic for Arabic. Keep the Latin wordmark left-to-right inside Arabic layouts.

Use forest or ink for text on paper. Lime is an accent, never small text on white. Preserve semantic success, warning and error colors.

Useful before it is decorative.

A coherent identity, from a 20px symbol to a planning workspace.





WRITE IT ZeeSpare

Clear, precise and grounded. Say what the planner can do next. Avoid guarantees and invented performance claims.

KEEP IT INTACT

Never stretch, rotate or mirror the mark. Never add effects. Use the supplied master assets; preserve spacing and contrast.
